

Rumen bolus is known as an excellent method for tamper-proof electronic lifetime traceability of ruminants. Nedap has used its extensive knowledge on Rfid to create a bolus with excellent reading performance.

For a quick and easy electronic read of rumen animals frequently, this is the bolus to use.

The EID Bolus is suitable for cows, goats and sheep:

- Excellent reading performance
- Designed for day to day use
- Suitable for different ruminants
- For both management and traceability

Specifications

Dimensions

Length : 65 mm
Diameter : 20 mm
Weight : 63-65 grams

Transponder

FDX-B 134,2 kHz
Compliant with ISO 11784/11785

Material

The transponder is capsulated by a high quality ceramic material made of AL_2O_3

Specifications are subject to change without prior notice
